FAQ

Q1: Where can I find a parts diagram for my 1998 Suzuki 350 King Quad?

A1: Parts diagrams are often included within the owner's manual itself. If not, you can usually find them online through Suzuki's official parts website or through various online ATV parts suppliers.

These diagrams are essential for identifying specific components when ordering replacements.

Q2: How often should I change the oil in my 1998 King Quad?

A2: The recommended oil change interval is typically specified in your owner's manual, but generally, it's recommended to change the oil every 25-50 hours of operation or every 3-6 months, whichever comes first. This is crucial for engine health.

Q3: What type of oil should I use in my 1998 Suzuki 350 King Quad?

A3: The correct oil type and viscosity are specified in your owner's manual. Using the wrong oil can damage your engine. Always refer to the manual before performing any maintenance task.

Q4: My King Quad is overheating. What should I do?

A4: Overheating is a serious issue. First, immediately turn off the engine and allow it to cool down. Then, check the coolant level, inspect the radiator for blockages, and check the fan's operation. If the problem persists, consult your manual or seek professional help.

Q5: How do I adjust the carburetor on my 1998 Suzuki 350 King Quad?

A5: Adjusting the carburetor is a complex task that requires specific knowledge and tools. Improper adjustment can damage the engine. Consult your owner's manual for specific instructions or take it to a qualified mechanic.

Q6: Where can I find a repair manual for my 1998 Suzuki 350 King Quad?

A6: Repair manuals, separate from the owner's manual, may be available through online retailers or specialized ATV repair shops. These manuals provide more in-depth repair procedures than the owner’s manual.

Q7: My King Quad’s transmission is slipping. What could be the cause?

A7: Transmission slippage can be due to low transmission fluid, worn clutch plates, or internal transmission damage. Inspect the fluid level first. More extensive problems will require professional diagnosis and repair.

Q8: What is the recommended tire pressure for my 1998 Suzuki 350 King Quad?

A8: The recommended tire pressure is usually found on a sticker on the ATV itself or inside the owner's manual. Maintaining proper tire pressure is important for optimal handling, traction, and tire longevity. Always check pressure before each ride.
