- **Diagrammatic Reasoning:** These questions use diagrams, charts, or flowcharts to represent complex relationships. You'll need to interpret the visual information and use logical deduction to answer questions about the relationships shown.
- **Verbal Reasoning (Logical):** This involves evaluating arguments presented in text form. You might be presented with a short passage followed by questions testing your comprehension of the underlying logic and the validity of the conclusions drawn. This often involves identifying assumptions, fallacies, and inconsistencies.
