Utilizing the Key Features of Your Mitsubishi Outlander Navigation System

This section explores the core features found in most Mitsubishi Outlander sat nav systems, providing step-by-step instructions and practical examples.

Route Planning and Destination Input:

Entering a destination is usually done through several methods:

voice command (speak the address clearly), manual input via the touchscreen (using the on-screen keyboard), or selecting a point of interest (POI) from the system's database. The system then calculates the optimal route, considering traffic conditions (if the live traffic feature is activated and subscribed to), and presents you with multiple route options if available. Always double-check the suggested route before embarking on your journey.

Navigating with Voice Guidance:

Your Mitsubishi Outlander's sat nav system likely employs clear and concise voice instructions. These prompts guide you through turns, lane changes, and distance to your destination. Adjusting the volume and language settings is usually straightforward through the system's menu. Remember to maintain focus on driving while listening to the voice guidance.

Managing Points of Interest (POIs):

POIs are pre-programmed locations like restaurants, gas stations, hotels, and attractions. Your Mitsubishi Outlander's sat nav system allows you to search for POIs by category or name. Many systems also allow you to add custom POIs, saving frequently visited locations for quick access. This feature greatly enhances the convenience and practicality of the navigation system, especially for regular commutes or trips to familiar locations.

Utilizing Map Updates and Software Versions:

Keeping your Mitsubishi Outlander's navigation system up-to-date is crucial for accurate map data and optimal performance. Map updates often introduce new roads, updated points of interest, and improved functionality. Check your Mitsubishi Outlander sat nav manual or the official Mitsubishi website for instructions on how to update your maps and software.
