```
resized_img = img.resize((200, 150))
```

## Save the resized image

```
resized_img.save("resized_image.jpg")
```

## Rotate the image 90 degrees counterclockwise

```
rotated_img = img.rotate(90)
```

```
rotated_img.save("rotated_image.jpg")
```

blurred_img.save("blurred_image.jpg")
```

## **Convert image to grayscale**

```
gray_img = img.convert("L")
```

```
gray_img.save("grayscale_image.jpg")
```

## **Crop a section of the image**

```
cropped_img = img.crop((100, 50, 300, 200)) # (left, upper, right, lower)
coordinates
```

```
cropped_img.save("cropped_image.jpg")
```

```
...
```
