Frequently Asked Questions (FAQ)

Q1: My Skoda Symphony system won't play MP3 files from my USB drive. What could be the problem?

A1: This could be due to several factors: The USB drive may be formatted with an incompatible file system (try FAT32); the MP3 files might be corrupted or encoded in an unsupported format; the USB drive itself might be faulty; or there might be a software issue with the Skoda Symphony head unit. Try a different USB drive and reformat the original one in FAT32. If the problem persists, contact a Skoda service center.

Q2: How do I pair my phone via Bluetooth with my Skoda Symphony system?

A2: The process involves putting your phone into pairing mode, then searching for available devices on the Skoda Symphony system. The exact steps may vary slightly depending on your phone's operating system and Skoda model. Consult your car's owner's manual or your phone's instruction manual for detailed guidance. Once paired, you can stream audio wirelessly or use hands-free calling.

Q3: My CD player is skipping. What should I do?

A3: The most common causes are a dirty CD player lens or a scratched or damaged CD. Try cleaning the lens with a specialized CD lens cleaner. If the issue persists with multiple CDs, you may need professional service to fix a problem with the CD player mechanism.

Q4: The sound quality from my USB drive is poor. What can I cause this?

A4: Low bitrate MP3 files generally have poorer sound quality. Try using higher bitrate MP3 files (e.g., 320kbps). Also, ensure that your USB drive is not overloaded with files, which could lead to performance issues and potentially affecting sound.

Check Skoda's official website for your specific model year and trim level to determine if updates are available and how to install them. Improper firmware updates can damage your system, so proceed cautiously and follow the instructions carefully.

Q6: My AUX input isn't working. What should I check?

A6: First, ensure that the AUX cable is properly connected to both your device and the AUX input jack on the Skoda Symphony system.
